#AnyoneAnything

INFINITE LEARNING

Frontend Developer

Key Responsibilities

1. Develop responsive and reusable frontend components for web applications.
2. Translate UI/UX designs into clean, scalable, and maintainable code.
3. Optimize frontend performance including loading speed and rendering efficiency.
4. Integrate frontend interfaces with backend APIs and services.
5. Ensure cross-browser compatibility and responsive behavior across devices.
6. Maintain code quality, structure, and documentation for scalable development.

Required Skills

Technical Skills

- ✅ Proficiency in HTML, CSS, and JavaScript
- ✅ Experience with modern frameworks such as React, Vue, or Angular
- ✅ Strong understanding of responsive design and accessibility principles
- ✅ Experience integrating REST APIs or backend services
- ✅ Familiarity with Git version control systems
- ✅ Knowledge of frontend performance optimization and debugging
- ✅ Experience with Docker containers and workflows
- ✅ Understanding of DevOps (CI/CD) and microservices environments

#AnyoneAnything

INFINITE LEARNING

Backend Developer

Key Responsibilities

1. Build backend services and RESTful APIs for web applications.
2. Develop server-side logic and application workflows.
3. Seamlessly integrate backend systems with frontend applications and external services.
4. Improve backend performance, scalability, and reliability.
5. Work with DevOps and engineering teams to support deployment pipelines.
6. Maintain high code quality, comprehensive documentation, and backend architecture standards.

Required Skills

Technical Skills

- ✅ Proficiency in Python or JavaScript for backend web development.
- ✅ Proven experience building and maintaining REST APIs.
- ✅ Experience creating and managing Docker containers (Dockerfiles, workflows, etc.).
- ✅ Understanding of CI/CD practices and DevOps workflows.
- ✅ Familiarity with Microservices-based architectures.
- ✅ Version control using GitLab. Experience with artifact repositories (e.g., Artifactory).
- ✅ Basic knowledge of Kubernetes concepts.
- ✅ Familiarity with Tekton or other cloud-native CI/CD tools.

#AnyoneAnything

INFINITE LEARNING

Spatial UI/UX Designer

Key Responsibilities

1. Design intuitive and natural interactions for spatial computing.
2. Optimize gaze-based and hand-based usability for high-precision workflows.
3. Create workflow visualizations and spatial interface flows.
4. Develop ergonomic, accessible, and user-centered spatial UI concepts.
5. Collaborate with engineering teams to ensure designs are feasible and performant.

Required Skills

Technical Skills

- ✅ Strong understanding of 3D UI principles and spatial layout design.
- ✅ Knowledge of VR & MR ergonomics and human-factors considerations.
- ✅ Understanding of accessibility in spatial and immersive interfaces.
- ✅ Experience with flow-based spatial interface design.
- ✅ Skills in user behavior analysis for spatial interactions.
